

Park Grills

When it comes to your park guests enjoying a fun day of outdoor grilling, look no further. Correctional Industries offers an impressive line of multi-level park grills which are as appealing as they are durable.

3010
Family park grill with
optional utility shelf.

3012
Medium park grill with
optional utility shelf.

Alternate mount

3014
Large park grill.

MULTI-LEVEL GRILL FEATURES

All welded construction from 3/16" thick, 7-gauge steel, these park grills are meant for heavy-duty public use and can safely stand up to harsh weather conditions season after season. The cooking surfaces, range from 300 to 1,350 square inches. The adjustable height of the cooking surface offers greater heat control. Just above the coals or up to 12" above the firebox, it's all up to you. The coiled handle grips constructed of 1/4" steel rod help keep the heat where it belongs and away from your hands. All cooking surfaces tip up and out of the firebox while remaining attached to the unit. This feature also allows greater ease in starting your cooking fire and make cleaning a breeze.

Supported by 3-1/2" steel tubing, (6" for larger grills), and 40" high, all grills rotate 360 degrees for wind draft control. Finished with a non-toxic, heat resistant black powder coating, these grills are built to last. Cooking surfaces are not powder coated.

Grills may be bolted to concrete surface using base plate (as shown) or embedded utilizing alternate mount (see inset).

OPTIONS

Ask us about the optional utility side shelves. Constructed of the same high strength steel and sporting the same high quality finish, they simply bolt on with supplied hardware and are a great addition to your barbecue grill.
