

Campfire Rings

An outdoor fire is a natural gathering spot for cooking, roasting marshmallows and conversation. A campfire ring by Correctional Industries will enable your park guests to enjoy these activities safely and responsibly.

3000-7
Campfire ring with
angle anchors.

3000-9
Campfire ring with tip back design.

3000-13
Large campfire ring with double grill.

STANDARD FEATURES

All welded construction from 3/16" thick, 7-gauge steel, these campfire rings will contain the fire safely inside the ring and can safely stand up to harsh weather conditions season after season.

The permanently attached 290 square inch, single level, tip out cook surface and hinges are made from 5/8" steel rod. The coiled handle grips constructed of 1/4" steel rod help keep the heat where it belongs and away from your hands. Draft holes around the base of the ring help the fire burn more efficiently. Finished with a non-toxic, heat resistant black powder coating, these rings are built to last. Cooking surfaces are not powder coated. The formed 3/4" flange along the top edge of the ring is both a safety feature and reinforces the ring against heat warpage.

OPTIONS

Choose solid concrete mounting spades, concrete mounting anchor pins, or tip back anchor pins for easier cleaning.

CAMPFIRE RING SIZES

3000-7: 7-3/8"H x 32" Dia.

3000-9: 9"H x 32" Dia.

3000-11: 11-3/8"H x 56-1/4" Dia. (single grill)
