

PICNIC TABLE FEATURES

Our 6 and 8-foot long picnic tables sport a convenient and safe walk through design. The seats are attached to the unit, allowing easier movement for mowing, as well as prevention of tipping when only one side is being used. The legs are tucked neatly beneath the seats to prevent tripping hazards.

Choose from wood or aluminum table and seat planks. The wood table planks are cut from 24S select grade, Douglas fir and sanded smooth for safety and appeal. These planks are then finished with a clear, mildew resistant, wood preservative to provide years of use and enjoyment. The aluminum table planks are virtually maintenance free and finished in a durable clear satin anodized coating. Matching end caps add a touch of class and beauty. All tables utilize five 2" x 10" planks – three for the top and one for each seat bench.

The one piece, all welded end frames (2 per table), are made from 16-gauge, 2-1/4" O.D. aluminized steel tubing. Tubular steel braces are attached to each end frame. The opposite end of the braces attach to a die formed steel channel iron which also serves to tie the table top planks securely together.

All wood planks come pre-drilled for fast, easy assembly using 3/8" zinc plated carriage bolt (included). Aluminum planks come supplied with all necessary mounting hardware.

TABLE DIMENSIONS

Seat Height: 18"

Overall: 30"H x 58-1/4"W

PARK BENCH FEATURES

Our park style benches invite you to stop and rest a while. Available in 6 and 8-foot lengths, they are as easy to assemble as they are to use. Finish these benches with your choice of the same impressive-looking planks as our picnic tables and you will have a bench that beckons everyone to sit and relax.

Contact Correctional Industries for prices on all picnic tables and park benches.*
